

# My Profile

---

- Brief
- R&D Director in [JD.COM](#) and Corpartner in SchoolPal, over 18 years Web2 Product and Engineering experience.
- MBA of ZJU, Top 3 of China, expert in building and training engineering teams to get the result.
- An Experienced Product and Project Manager, Team player with OKR and agile dev.
- Skilled in planning and design high performance systems: annual GMV 4.6 billion, serving 30 million customers.
- Web3 Opensource Community Founder and core member.
- Writing and speaking English fluently.
- Diving into Web3 in 2022!
- [jhfnetboy@gmail.com](mailto:jhfnetboy@gmail.com)

## Basic information

---

- Lucas J, Male, China,
- ZJU Master of Business Administration, which be China's top three.
- Over 18 years experience in the Internet, e-Commerce, SAAS area.
- As a Tech Director, I have been in charge of the R&D team of more than 150 people in [JD.COM](#)
- Practice in Web3 and Crypto area for about 2 years.
- Active Web3 Open-source Community contributor.
- [Github of Mine](#)
- [Github dashboard of jhfnetboy](#)
- [Rebase community core member](#)
- [DAPP Learning DAO co-founder/core member](#)
- [Mirror](#)
- [Lindedin](#)

## Web3 experience

---

- Buy ETH in 2016
- Run a part-time product like DAOs product in 2016
- Trade on Binance in 2017
- Write a paper focusing on individual's value in 2018
- Be a Self-Staker of Beaconchain Validator in 2019
- As core member, build most popular solidity project on Github(DApp Learning DAO) in 2020
- Be a core member and adviser of Rebase community in 2020

- As a member of genesis, build [DAOatlas.com](https://daoatlas.com) in 2021
- Do some Web3Brand research and thinking in 2022

## Recently

---

- About 4 months ago, left an education SAAS company as Copar(core partner).
- Now holding an E-commerce department in a startup.
- Run a medium on Wechat with about 1 thousand fans.
- Write a hack post every week for the Rebase community.
- Contribute some Web3, AR code or DAO research to the DApp Learning Github repo.
- Thinking about the Web3.

## Practices on Web3

---

- A basic BSC Chain trade bot on Pancake (NodeJs) .
- [TradeBot](#)
- A part text game with NFT and data package loading (like rarity) (React, NodeJs/JSX).
- [1](#), [2](#), [3](#)
- [Demo](#)
- A arweave tool for uploading video with permanent storage(NodeJs,AR API).
- [Github](#)
- A DAO collection website, community cooperation buiding.
- [DAOAtlas](https://daoatlas.com)

## Experience in Engineering

---

- From abstracting the model of real life description, to building the user case and UML diagrams, to coding and running.
- As a team leader, I am very happy working with teams, empowering the team potential to deliver the product.
- As a tech manager, I am skilled in planning, checking, giving solutions, consulting on problems, agile development.
- As a multiline products holder, I communicate with many roles, engaging meetings, make agreements with different departments, to make impossible to possible.

## Skills on Engineering

---

- Team building and running: I have over 10 years tech management career on R&D teams, especially on recriut and training China local smart engineers.
- Knowing how to build a product with software engineering rules, it is a complex procedure with technology and arts.

- Running many online products with millions of end users and customers with high performance, it is not only to monitor the server, but to plan all conditions and preparations to a variety of risks.

## Skills on developing

---

- I am not a high efficiency programmer, but I will code myself for the prototype and basic models.
- Also I am a full stack engineer: React, Node.js, Golang, are my favourite languages.
- Web3 is amazing, I have built some toys and experiments or products, I want to dive into it.
- I have basic dev skills on Hardhat, Solidity, Graph, Docker, Ethereum network, Web3.js and something else.
